

Wimbledon College uses an automated (i.e. electronically-operated) recognition system. This is for the purposes of *registration and catering*. To do this we use information about your child. The information from your child that we wish to use is referred to as 'biometric information' (see next paragraph). Under the Protection of Freedoms Act 2012 (sections 26 to 28), we are required to notify each parent of a child and obtain the written consent of at least one parent before being able to use a child's biometric information for an automated system.

Biometric information and how it will be used

Biometric information is information about a person's physical or behavioural characteristics that can be used to identify them, for example, information from their fingerprint. The school would like to take and use information from your son's thumb print and use this information for the purpose of providing your son *with the means to register and to pay for their food in the refectory*.

The information will be used as part of an automated biometric recognition system. This system will take measurements of your son's thumb print and convert these measurements into a template to be stored on the system. An image of your son's thumb print is not stored. The template (i.e. measurements taken from your son's thumb print) is what will be used to permit your child to access services. You should note that the law places specific requirements on schools when using personal information, such as biometric information, about pupils for the purposes of an automated biometric recognition system.

For example:

- (a) the school] *cannot* use the information for any purpose other than those for which it was originally obtained and made known to the parent(s) (i.e. as stated above);
- (b) the school must ensure that the information is stored securely;
- (c) the school must tell you what it intends to do with the information;
- (d) unless the law allows it, the school cannot disclose personal information to another person/body - you should note that the only person/body that the school wishes to share the information with is *Cyclone Industries Limited*. This is necessary as they maintain the software and they only have access to the templates, not your son's thumb print.

Providing your consent/objecting

As stated above, in order to be able to use your son's biometric information, the written consent of at least one parent is required. However, consent given by one parent will be overridden if the other parent objects in writing to the use of their son's biometric information. Similarly, if your son objects to this, the school cannot collect or use his biometric information for inclusion on the automated recognition system.

You can also object to the proposed processing of your son's biometric information at a later stage or withdraw any consent you have previously given. This means that, if you give consent but later change your mind, you can withdraw this consent. Please note that any consent, withdrawal of consent or objection from a parent must be in writing.

Even if you have consented, your son can object or refuse at any time to their biometric information being taken/used. His objection does not need to be in writing. We would

appreciate it if you could discuss this with your son and explain to them that they can object to this if they wish.

The school is also happy to answer any questions you or your son may have.

If you do not wish your son's biometric information to be processed by the school, or your son objects to such processing, the law says that we must provide reasonable alternative arrangements for children who are not going to use the automated system to register or buy food in the refectory.

Please note that when your son leaves the school, or if for some other reason he ceases to use the biometric system, his biometric data will be securely deleted.
